DETAILED ACTION

Claims 1-9 are active in this Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Bewicke (US 5,820,867). The claims are directed to a composition and method of treating depression comprising St. John's Wort, folic acid derivatives and Vitamin B12.

Bewicke discloses a dietary supplement composition that serves as an anti-depressant comprising an extract of St. John's Wort, Vitamin B12 and folic acid (column 1, lines 25-33 and column 2, lines 33-40). Bewicke teaches every element of claims 1, 3 and 7. Accordingly, Bewicke anticipates claims 1, 3, and 7.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bewicke (US 5,820,867). While the reference does not expressly teach applicant's claimed percent weight of folic acid derivative or vitamin B12, differences in concentration will not support the patentability of subject matter encompassed by the prior art unless there is evidence indicating such concentration is critical. Where the general conditions of a claim are disclosed in the prior art, it is not inventive to

discover the optimum or workable ranges by routine experimentation. *In re Aller*, 220 F.2d 454, 105 USPQ 233, 235 (CCPA 1955).

One would be motivated to modify the teachings of Bewicke with the expectation of building upon a St. John's Wort long history of providing relief from depression in a high percentage of individuals without causing the negative side effects often found when prescription drugs are used.

Conclusion

No claims are allowed at this time.
